Game Rule and design

1. UP and DOWN

There will be 2 block of Red and green,red will be for down and green for UP bidder,when they click for UP or Down thier profile pic will display on perticuler block +recent 10 bidder in that perticuler block.(as on img)

Bidder can see how many of bidder chooses up and how many of them chooses down.

Bidder can bid on both side either up or down,there will be a bid of multiplication of 10 wallet coins,where 1 coin will be of 1 RS value.

The cycle of up and down production will be of 3 min, first min user will bid for price after 1 min,second minute user will see where market is going up or down,and at stop of 2nd min if the price is up or down,user will get rewarded for the same ratio as discussed.

Price at starting should be there with current time followed by this and time left for that perticuler cycle.
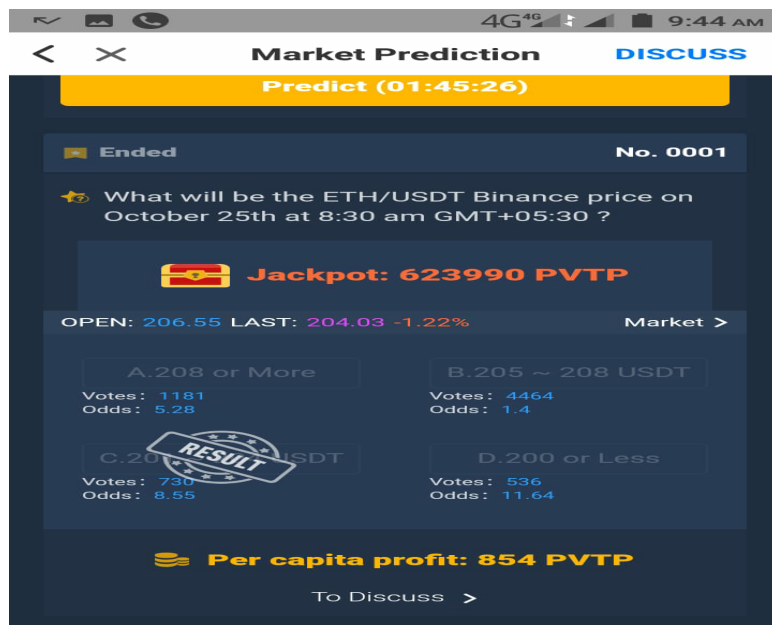

User can see history of bid,result,leaderboard.

On bidding if user have fund in wallet it will be deducted from there if not it will redirect to add fund option,and than can join directly.

Members can withdraw winning amount but not deposited amount,he have to use deposit amount to play production game only,but he can use winning amount for play and withdraw both.

2. Binary pridiction-

There will be a pridiction- of btc/eth/ltc in 1 hrs in different section for each.there will be 4 options like-as img

Bidder can see how many of bidder chooses 1,2,3,4 option and what he will get as per bidding ratio.

Bidder can bid on all 4 option ,there will be a bid of multiplication of 10 wallet coins,where 1 coin will be of 1 RS value.

The cycle of binary production will be of 60 min, with timer on it.first 30 min user will bid for

price after 30 min,second 30 minute user will see where market is going up or down,and at stop of 2nd 30 min the price of perticuler slot user will get rewarded for the same ratio as discussed.
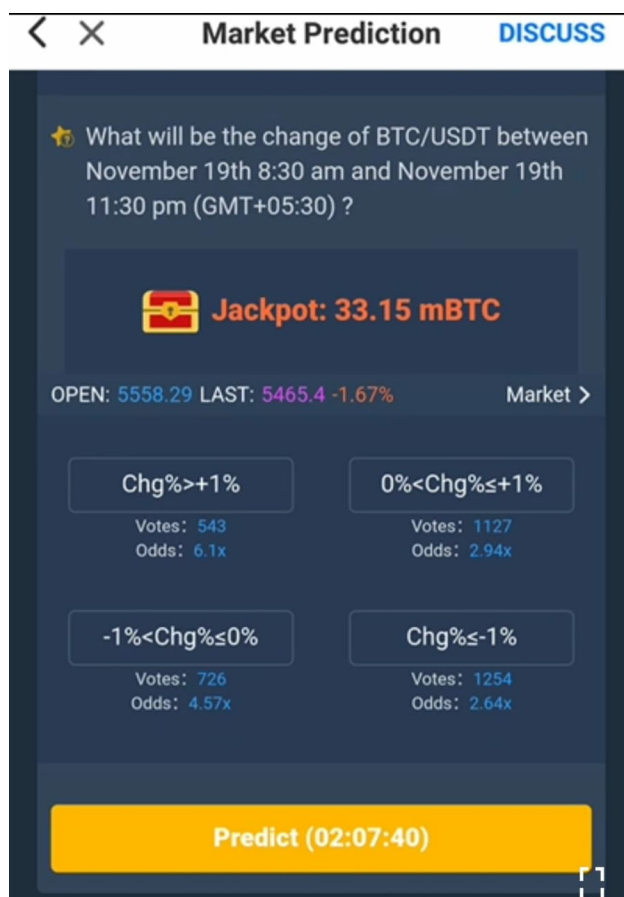

Price at starting should be there with current time followed by this and time left for that perticuler cycle.

User can see history of bid,result,leaderboard.

On bidding if user have fund in wallet it will be deducted from there if not it will redirect to add fund option,and than can join directly.

Members can withdraw winning amount but not deposited amount,he have to use deposit amount to play production game only,but he can use winning amount for play and withdraw both.
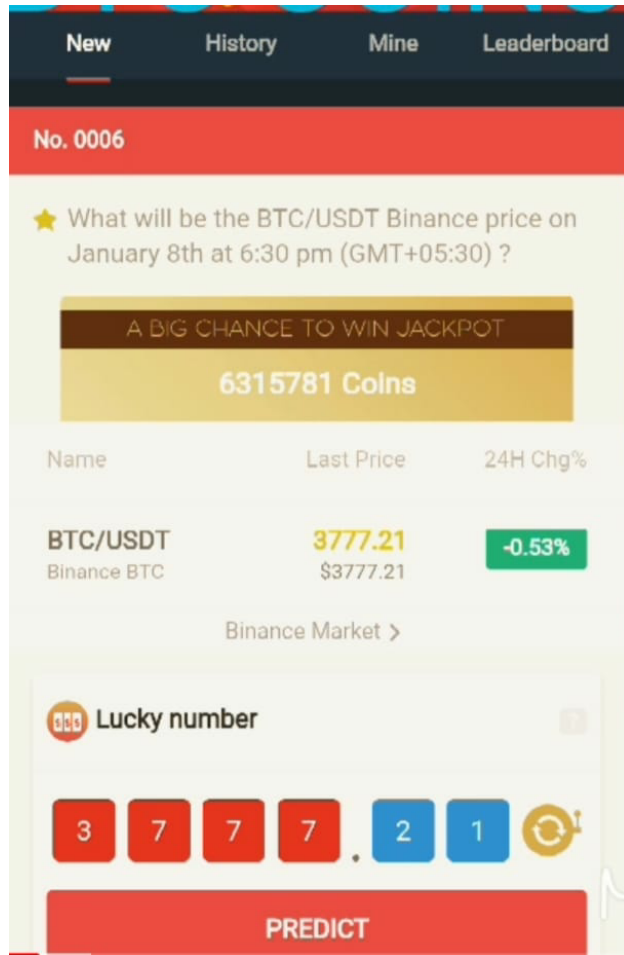

3.HIGH PROFIT-

In high profit almost things will be same but just it will show in percent changes and time will be

of 24 hrs,mean 1 contest per day,but we can add multiple contest with different time frame.remain things will same as binary pridiction.

4. JACKPOT-

In jackpot pridiction bidder will pridict coin price at perticuler price with variable value of contest,mean there will be 3-4 type of contest like 1lakh price with entry fee of 10 RS,5 lakh with entry fee of 25 RS and so,that can be edit with banner also(that I can manage if I create more than these 2)

We will also create a free pridiction contest where members can pridict free and if they will be exactly correct they will receive a custom amount.

The closed bidder will get rewarded 40% of total entry fee and remain 35% will be distributed to next 99 members as per thier leaderboard.

User can not see others bid amount,but after result they can see status of leaderboard of top 100 bidder,we will also give a link where bidder can check in which rank what they will get.It will be different for every contest as per entry fee.

Remain funding and withdrawal rule will be same as above.
